

# Fundamental of Programming with C#

---

## Day 4 Quiz

Write a program to perform PIN validation for the Bank of ISS. User account should be locked out if the user fails to enter the correct PIN within three tries. You can hardcode the PIN in your code (put it in a variable.)

### Sample outputs:

```
Welcome to the Bank of ISS
Enter your PIN: 123456

PIN accepted. You can access your account now.
```

```
Welcome to the Bank of ISS
Enter your PIN: 111111

Incorrect PIN. Please try again.
Enter your PIN: 222222

Incorrect PIN. Please try again.
Enter your PIN: 333333

Too many wrong PIN entries. Your account is now locked.
```

### Notes:

Please write the program complete with class declarations, main method declarations, namespace and using statements.
